AUTONOMOUS

IT Integration Report

Academic Year – 2022-23

The integration of IT and reforms in examination procedures, including Continuous Internal Assessment (CIA), has significantly enhanced the Examination Management System (EMS) of our institution. During this academic year, examinations were conducted offline for first, second, and third-year undergraduate, as well as first and second-year postgraduate courses. Odd semester examinations took place in December 2022, and even semester examinations were held in April 2023. The institution adhered 70:30 pattern, as per the statute accepted and approved by the Governing body and Academic Annual Quality Assurance Report of Sangameshwar College, Solapur Council.

The centralised examination unit of the institute organizes examinations for 70% of the marks under the title SEE (Semester End Examination), while the remaining 30% marks, known as continuous assessment (CA), are conducted by individual departments. Departments scheduled tests for respective courses and utilized Google Forms to conduct online continuous assessment (CA) examinations. The institution aims to automate all processes by integrating IT with a well-established examination system. Currently, the institution employs software known as CIMS Master Soft ERP Solutions Pvt. Ltd., which is a cloud-based platform facilitating the preparation of examination timetables, automatic block allotment, mark entry, result sheet generation, record maintenance, and result analysis. A separate examination grievance redressal cell addresses student grievances related to exams. The cell receives offline complaints through applications and resolves them with appropriate solutions.

Additionally, we employ OMR sheets for the compulsory first-year undergraduate subject titled "Democracy, Elections, & Good Governance." These sheets undergo processing using computerized OMR checker software, and the results are generated through the same software.
